EXPERIENCE

Data and analytics leader with 15+ years of experience across healthcare payer data, master data management, data governance, data quality, analytics, and regulatory compliance. Graduate work in applied business analytics strengthens hands-on capability in Python, SQL, Pandas, statistical modeling, BI, data management, AI governance, and human-in-the-loop analytics. Known for translating complex healthcare data into trusted, actionable insights while protecting HIPAA, PII, and enterprise data integrity requirements.

Arkansas BlueShield BlueCross

Bentonville, AR

MDM Lead Data Analyst, Arkansas BCBS

Sept 2021 – Present

- Lead enterprise data initiatives across member, provider, and reference domains to align our data assets with the company's overall roadmap.
- Partner with data governance and compliance teams define business glossaries, data dictionaries, and data quality indicators (DQIs) within the metadata portal.
- Perform data accuracy, integrity, and reliability validation using complex SQL queries across high-volume healthcare datasets.
- Communicate product priorities, roadmaps, and data experiments to both technical teams and executive leadership.
- Use metrics to spot future needs, helping reduce production data defects by ~20% and privacy incidents by ~45%.
- Conducted analytics on sensitive transactional healthcare data, contributing to a ~45% reduction in privacy-related incidents.
- Served as a liaison between business, IT, analytics, and governance teams, translating healthcare business requirements into data mappings and validation rules.
- Introduced data balancing and reconciliation reports aligned to payer business metrics, resulting in a ~70% reduction in customer data incidents.
- Delivered data visualizations and BI reports that improved stakeholder understanding of healthcare trends and improved operational efficiency by ~15%.

TETRASOFT

Little Rock, AR

MDM Lead Data Analyst (Client - Arkansas BCBS)

Mar 2020 – Sept 2021

- Supported Arkansas BCBS healthcare payer systems as an MDM Lead through a consulting engagement.
- Designed and executed unit testing plans and data validation scenarios for multiple data sources to ensure healthcare data quality and integrity.
- Developed and optimized Ab Initio graphs, plans, and SQL queries to improve healthcare data processing performance.
- Collaborated with business, analytics, and technical teams to identify data gaps impacting member and provider domains.
- Deployed tested healthcare data pipelines and reports across multiple environments following SDLC best practices.

ACCENTURE

Hartford, CT

Application Development Specialist (Client – Cigna)

Oct 2016 – March 2020

- Collaborated with clients to make data driven decisions based on insights from data analytics and visualization.
- Led QA teams with 2 Onshore, 1 nearshore and 21 offshore resources by driving built-in-quality engineering practices.
- Partnered with project managers, business analysts, SME's, development teams, and conducted meetings with QA team to ensure test readiness process; Conducted technical reviews with stakeholders for QA deliverables.
- Analyzed business requirements, technical specifications documents and tested restful API's.

- Performed statistical analysis on Rebates specific data to provide data-driven analysis and insights to help support business strategies.
- Presented recommendations and insights to senior leadership and business partners by developing dashboards.
- Estimated test efforts for 50+ intake projects and change requests using Accenture's ADM estimator tool.
- Responsible for smoke, functional, Regression, Integration, User Acceptance Testing (UAT) across different environments and Data validation.
- Enable effective business data decisions by collaborating with multiple cross functional teams such as on Product teams, IT teams, Data and engineering teams
- Liaison between technical and non-technical stakeholders to understand and support data needs
- Translated stakeholder requirements into deliverables such as data flow diagram in Microsoft visual studio.
- Proposed design of error handling techniques and audit process to monitor the production cycle to avoid further errors in processing.
- Optimized the SQL queries which reduced the data loading time by 70%.
- Automated data load validation process using SSIS packages, stored procs and ESP for testing.
- Automated regression test suite of front-end applications using Cucumber ruby ATDD framework increasing the velocity of integration team by 65% and targeted in-sprint automation.
- Integrated automated stories with Jenkins jobs to support CICD pipeline.
- Utilized GIT repositories for code versioning of Ruby code.

ACCENTURE

Hartford, CT

Application Development Specialist (as Scrum Master with Client – Cigna)

Jan 2016 – Sept 2016

- Agile foundation level, Safe 4.5 Scrum Master and Advanced Scrum master certifications helped in mentoring team members on agile principles, methodology, techniques, and best practices.
- Organized daily stand-ups, sprint planning, demos, retrospectives and mentored team during PI planning events.
- Engaged with other Scrum Masters in Scrum of Scrums to increase the effectiveness of the PI goals.
- Worked with the Scrum Team and the Product Owner to negotiate the minimum viable product.

ACCENTURE

Hartford, CT

Application Development Senior Analyst (Client – Cigna)

Oct 2014 – Dec

2015

- Responsible for requirement analysis, traceability, test strategy, test plan creation and defect management.
- Tested and reviewed ETL mapping and transformation specifications based on the business requirements.
- Interfaced with business users, technical and non-technical stakeholders understand and support data needs.
- Extensive experience in identifying production problems and respective solutions.
- Automated validation steps to test transformation logic between source and target systems using SQL queries.
- Worked on data migration projects during infrastructure upgrades.
- Conducted performance testing for data loads using ESP jobs and shared the reports with shared-services teams.

ACCENTURE

Chennai, Tamil Nadu

Application Development Analyst (Client - Independence Blue Cross)

Sept 2012 – Sept

2014

- Formulated the QA plan for black box and white box testing of the application including unit, system, integration and performance testing; guided business users during user acceptance testing (UAT).
- Managed end-to-end complex data migration and transformations between systems.
- Provided timely status reporting to the Project Manager and stakeholders.
- Created regression test suite for test automation using selenium.

- Mentored new joiners on the team to meet project deadlines and improve quality standards.

ACCENTURE

Chennai, Tamil Nadu

Application Development Analyst (Client - Bank of America) 2012

Jul 2010 – Aug

- Delivered robust test plans and scenarios in compliance with client requirements.
- Performed compatibility testing across operating systems and browsers.
- Formulated methods to perform positive and negative testing against requirements.
- Led various work requests and baseline testing efforts.
- Created and shared status reports to stakeholders.

GRADUATE COURSEWORK AND PROJECTS

MS Applied Business Analytics, University of Arkansas

- Built applied analytics capability across Python, SQL, Pandas, BI visualization, statistical analysis, data warehousing, OLAP, SAP HANA concepts, machine learning, AI governance, and digital innovation.
- Completed decision-support analytics work covering sampling and data quality, descriptive analytics, hypothesis testing, ANOVA, linear and logistic regression, and dashboard storytelling.
- Completed business intelligence and knowledge-management work covering decision trees, clustering, KNN, neural networks, text mining, association rules, feature engineering, model improvement, and analytics ethics.
- Completed data-management systems work covering relational data modeling, SQL, stored procedures, Python-to-database integration, data warehousing, OLAP/SSAS concepts, in-memory analytics, and governance considerations.
- **Project 1 - Healthcare Inpatient Hospital Stay Data and AI Agent**
 - Built a Python process to bring together hospital inpatient data from multiple files, clean it, check it for errors, and prepare it for analysis.
 - Kept all 322,574 patient encounter records intact while matching them with supporting reference files such as ZIP code, diagnosis, procedure, and MS-DRG information.
 - Created a clean dataset that could be used by a healthcare analytics tool to answer questions about length of stay, hospital use, facility performance, diagnoses, procedures, and MS-DRG trends.
 - Prepared supporting documentation, including a data dictionary, validation summaries, testing notes, and guidance for using the analytics process responsibly.
- **Project 2 - Membership Identity Integrity Early Warning System**
 - Designed a sample healthcare data project to find possible member identity problems early, before they become larger data quality or privacy issues.
 - Used analytics and machine learning concepts from coursework to identify records that may need human review.
 - Built the project around a clear rule: the system can flag and explain possible issues, but a human data steward makes the final decision.
 - Defined success measures such as accuracy, missed issues, false alerts, review workload, and how clearly the system explains why a record was flagged.
- **Personal Projects:** Applied graduate analytics coursework to a portfolio of local-first, synthetic-data, AI, data quality, and healthcare identity projects using Python, SQL-oriented data design, statistical validation, explainability, governance controls, and reproducible documentation.
 - **Probabilistic Sentinel System PSS** - Created a sample healthcare payer dataset and scoring process to test how member records can be matched, reviewed, audited, and monitored for quality and fairness. Then improved the identity-scoring system so it can compare records, explain the reasons behind each score, track decisions, and send uncertain cases for review.
 - **Augmented Data Steward Model ADSM** - Built a review process for complex healthcare identity-matching cases, with first and second reviews, final resolution steps, audit history, and a simple local review app.

- **ZDIF Synthetic Reference Implementation** - Built a sample healthcare data-integration model that shows how records can be checked, corrected, validated, and moved through a controlled multi-step migration process.
- **ESP32-S3 Camera Robotics Project** - Built a PlatformIO Arduino project using ESP32-S3 camera server with Wi-Fi setup, HTTP page and stream servers, JPEG/RGB565 handling, PSRAM checks, troubleshooting documentation, and phone-based live viewing.

SOFTWARE TOOLS

ETL Tools: PowerCenter Informatica 9.0 and 10.0, Microsoft SSIS packages, Ab initio.

Query Tools: SQL, SQL Server Management Studio, TOAD for oracle, Teradata SQL Assistant, AQT, SAS.

Automation Testing Tools: Selenium cucumber with ruby, DB – SSIS, Stored procs, ESP – CA Workstation, Abinitio – expressIT.

Statistical and analytics tools: R programming, Python, Pandas, DuckDB, statistical modeling, machine learning, SHAP explainability

Reporting and dashboarding tools: Tableau, Power BI, Streamlit, analytics storytelling

Version Control tools: TFS, GIT, Sonarqube

Test Management Tools: HP QC/ALM, FITNESSE

Database: MS SQL Server 2008/2008R2/2012, MySQL, Oracle, MongoDB, DuckDB, data warehousing and OLAP concepts

Domain Knowledge: Health Care Insurance and Banking

QA Methodologies: Agile, Waterfall

CERTIFICATIONS

- ISTQB Foundation level
- US health care Certification and AHM250
- Certified Professional, Academy for Healthcare Management
- SAFe Certified Scrum Master and Agile foundation level certification
- SAFe Certified Advanced Scrum Master
- HP ALM
- Accenture Test Designer and Accenture testers certification

EDUCATION

University of Arkansas, Fayetteville

Master of Applied Business Analytics

Graduate coursework includes applied analytics, decision support, data management systems, business intelligence, ERP, AI and analytics, and digital innovation.

Fayetteville, Arkansas

Aug 2025 – Present

ANNA UNIVERSITY, PSG College of Technology,

**Bachelor of Engineering in Production Engineering
2010**

Coimbatore, Tamil Nadu

May 2006 – May
